Personal Power of Qi: "BAGUBA" Training and Conditioning Manual for All Athletes and Coaches

Brutally Aggressive Guy (Gay, Girl) Uninhibited by Adversity (rev2024-04-17a)

Andrew O. Jackson

Unlock the power hidden in well researched and evidenced based cognitive behavior modification therapies.

PQ1

Success or failure in competition (or in life itself) is a cognitive-emotional state first determined within the battlefield of the mind.

PQ2 Strength, speed, stamina, agility, cunning, and success come from positive, good-feeling emotions, moods, attitudes, and feelings when powerfully (and singularly) focused upon that which is wanted, desired, and intended.

PQ3

Champions, in sport or in life, prevail
because their cognitive-emotional
projection of reality becomes
dominant and prohibits the
competition from seeing the reality of
their own success.

Becoming a "BAGUBA" (Brutally Aggressive Guy (Girl, Gay) Uninhibited by Adversity)

Becoming a "BAGUBA" is *NOT* about brutally dominating the opposition — physically, emotionally, and mentally. Nor is a "BAGUBA" about tolerating and playing through pain, injury, and adversity. A "BAGUBA" is brutally aggressive in utilizing their own emotions to guide their own cognitive behavior towards health, well-being, and effective and successful decision-making prowess and ability. A "BAGUBA" develops and dictates (within their personal power of Qi) a focused and conscious state of desire, want, and intent to *allow* the forces of nature to rendezvous in a most spectacular and victorious competition.

An athlete's biology has evolved over millions of years of survival of the fittest, most powerful, strongest, and agile of bodies as well as survival of the most clever, creative, and cunning minds that ever have lived on this planet. An athlete's evolutionary heritage has survived billions upon billions of battles, conflicts, and encounters and is now at the pinnacle, the top, the summit of the highest peaks.

A character may be emotionally driven in a book, movie, opera, play, song, or video, but in science emotions do not drive behavior. Cognition, not emotion, precipitates the changes and states of neurological, biochemical, and physiological being in the brain and body that drives behavior. Emotions are the perception of these changes and states of physiological being. This is the evolved cognitive-emotional foundation within humanity that allows well researched and evidenced based cognitive behavior modification therapies to work and to be successful.

Teachers in academic education (language, literature, psychology, sociology, philosophy, and law) and coaches (athletics and sports) can and must work together in developing a student's evolved cognitive-emotional dynamics. Within the following pages, each athlete is going to learn how to use the power of their emotions to develop, maintain, and allow their evolutionary heritage of strength, speed, stamina, agility, cunning, health, well-being, and successful decision-making prowess and ability.

Each athlete will become an unstoppable and instinctive force on the field of play (and throughout their life) no matter the hardships, difficulties, and set-backs because they will have the tools, understandings, and skills to attain, maintain, and allow their evolved joyous being. And in their joy is their Personal Power of Qi. Each athlete will mentally, physically, and emotionally dominate the competition. They just need to learn how and make-it-so.

Passionately,

Andrew O. Jackson

"BAGUBA" Strength and Conditioning Trainer
1971 DeForest H.S. Wrestling "BAGUBA" of the Year

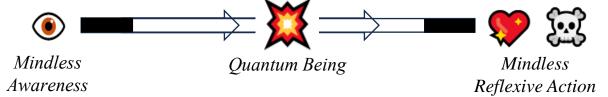

PQ4

To re-create the cognitive-emotional state of being of one's past, best performance is one step closer to creating now, a new best performance.

Sections Preview (30min)

Section 8.0: "Mindless" Awareness and Reflexive Action of Quantum Being

In **Section 8** the athlete will increase their power of "mindless" awareness and action to maximize competitive performance and to prevent injuries.

"As a child I was working in the fields with my father when he looked up at the sky. He had "heard" some geese. As a lifelong birder this would be normal. But I heard nothing. After several minutes past, the geese and their distinctive "honking" came into *my awareness*."

"I was in a wrestling match I was supposed to win. Action stopped with 10 seconds to go and I was 1pt behind. I was on top. Again I thought, "I am supposed to win this match!" The whistle blew and my mind went blank. My body just acted on its own.... cross-body ride, thrust forward, chicken wing his arm to a near fall....2pts."

"Mindless" awareness and action revolve around the exciting constructs of "Personal Power of Qi", "Quantum Being" and "Follow Your Passion" which exist beyond our normal time, space, and physical worlds of boring daily life.

Section 7.0: Gut Awareness and Intuitive Action of "Mind"

In **Section 7** the athlete will increase their power of intuitive awareness from the perception of emotions, "feelings" and other senses (with the interpretive power of "mind") to maximize competitive performance and to prevent injuries.

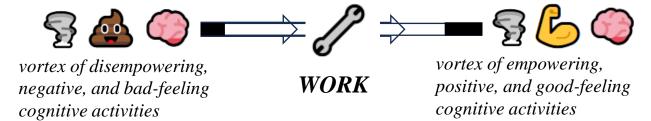

"While living in El Paso, TX, I went into the shower to clean off the desert grime. Something was wrong. I smelled the presence of death. Immediately I froze. I turned to my right and there I was naked and eyeball to eyeball with a scorpion."

A player cannot know (or act on) the subtleties playing out within the game if they are (1) camouflaging their emotional state with mental chatter, (2) actively suppressing, ignoring, or controlling their emotional state of being, or (3) preoccupied by being mindfully aware with "acceptance and without judgment". Emotions have evolutionary survival meaning and have a cooperative relationship with "mind" in competition for success.

Page 9

Sections Preview

Section 6.0: Cognitive-Emotional Re-Processing for Health, Well-Being, and Success (30min)

In **Section 6** the athlete will develop their skills, tools, and abilities to reprocess, re-structure, and re-develop dis-empowering negative, bad-feeling, and unhealthy cognitive behaviors into positive, good-feeling cognitions that correlate with a powerful, strong, robust, and healthy physiology of the brain and body. The athlete will develop the skills and ability to have the power of choice between feeling emotionally bad (and the perception of an unhealthy, weak, and dis-empowered physiology) or feeling emotionally good (and the perception of a healthy, robust, and empowered physiology).

Section 5.0: Cognitive Behavior Precipitates Changes and States of Physiology (30min)

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

In **Section 5** of this manual, each athlete will learn and understand that disempowering thoughts precipitate the changes and states of physiology in the brain and body that are perceived as bad-feeling emotions, moods, attitudes, and feelings. Conversely, empowering thoughts precipitate the changes and states of physiology in the brain and body that are perceived as good-feeling emotions, moods, attitudes, and feelings. Disempowering, negative, and bad-feelings (that are indicative of a unhealthy physiology vanish when the athlete focuses on empowering cognitive thoughts and activities that are indicative of a healthy physiology.

Sections Preview

Section 4.0: The Power of Emotions, Moods, Attitudes, and Feelings

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

In Section 4 of this manual, the athlete will learn and understand how good feeling emotional awareness has evolved to correlate with their health, well-being, and successful decision-making physiology of the brain and body.

Emotions, moods, attitudes, and feelings are not about what others and the world are doing "to you." Emotions are about what "you" are doing to "yourself". The athlete will learn and understand how any negative and bad-feeling emotions, moods, attitudes, and feelings like anxiety, depression, nervousness, anger, jealousy, and revenge have an evolved correlation with a dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury). And the athlete will learn and understand how power, strength, speed, stamina, agility, cunning, and success have evolved with positive, good-feeling emotions, moods, attitudes, and feelings. That is, feeling emotionally good is the perception of a healthy, robust, and empowered physiology of the brain and body (that leads to health, well-being, and successful and effective decision making prowess and ability).

Section 3.0: Definitions (30min)

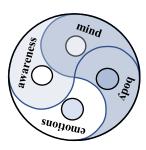

In Section 3 the athlete will learn about the language of the mind, body, emotions, and awareness. Learning and understanding the language and relationships between the mind, body, and emotions are critical to developing, maintaining, and allowing one's evolutionary powers of strength, speed, stamina, agility, cunning, and success. An athlete assembles their world in a vortex of words and their meaning. The mountain exists as it does because we have been taught to believe it so.

Page 11

Section 2.0: The Symbiotic Synergy Between Mind, Body, Emotions, and Awareness (30min)

In **Section 2** the athlete will increase their understanding and power of the symbiotic synergy between mind, body, emotions, and awareness. Mind, body, emotions, and awareness are not separate, individual, and conflicting entities. They are an intertwined web that has evolved to work in synergistic harmony towards health, well-being, and successful decision-making prowess, ability (and their actualization).

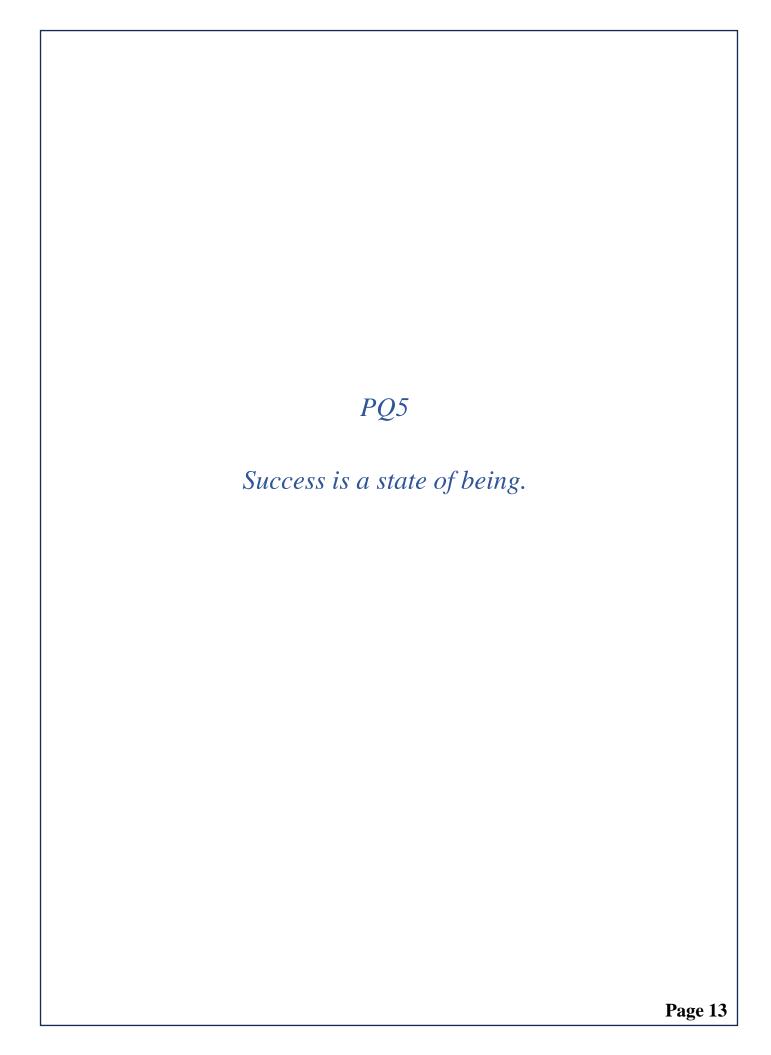

Emotions have not evolved to be controlled, regulated, and managed by cognition, but to guide cognitive activities towards good-feeling healthy, strong, and robust physiology in the brain and body. Negative, bad-feeling cognitive activities have an evolved correlation with an unhealthy, weak, and frail physiology prone to sickness, injury, and poor decision-making capacity. This is the foundation of today's successful, evidenced based cognitive-behavior modification therapies.

Section 1.0: The Actualization Process: Allowing your Intentions (30min)

Section 1 is about acting as an individual (or team) with intent, purpose, and awareness to allow the successful actualization of the mechanics and techniques of a move, position, or play in any sport such as in golf, tennis, basketball, baseball, hockey, wrestling, sailing, skiing, or what ever your sport may entail.

Actualization is a process beginning from an overall state of intention (to be victorious) and steps down through the localized segments of intention at each of the various stages (segments) of the competition. A player must cognitively know and emotionally feel (until they know they know) and then "allow" their want, desire, and intent *at each and every stage or segment* within their game, play, move, or "shot" to be successful. Until you "know you know it," you can not "allow it" to happen and be successful. Intend, think, feel, know, and then allow.

PQ7

The outcome of a competition,
or conflict in life itself,
matches the cognitive-emotional state of being
of the victor and the loser.
The play of the game is just an opportunity to
determine who has the greater capacity to
remain in which state.

PQ8

To cognitively will and force behavior

while ignoring one's own

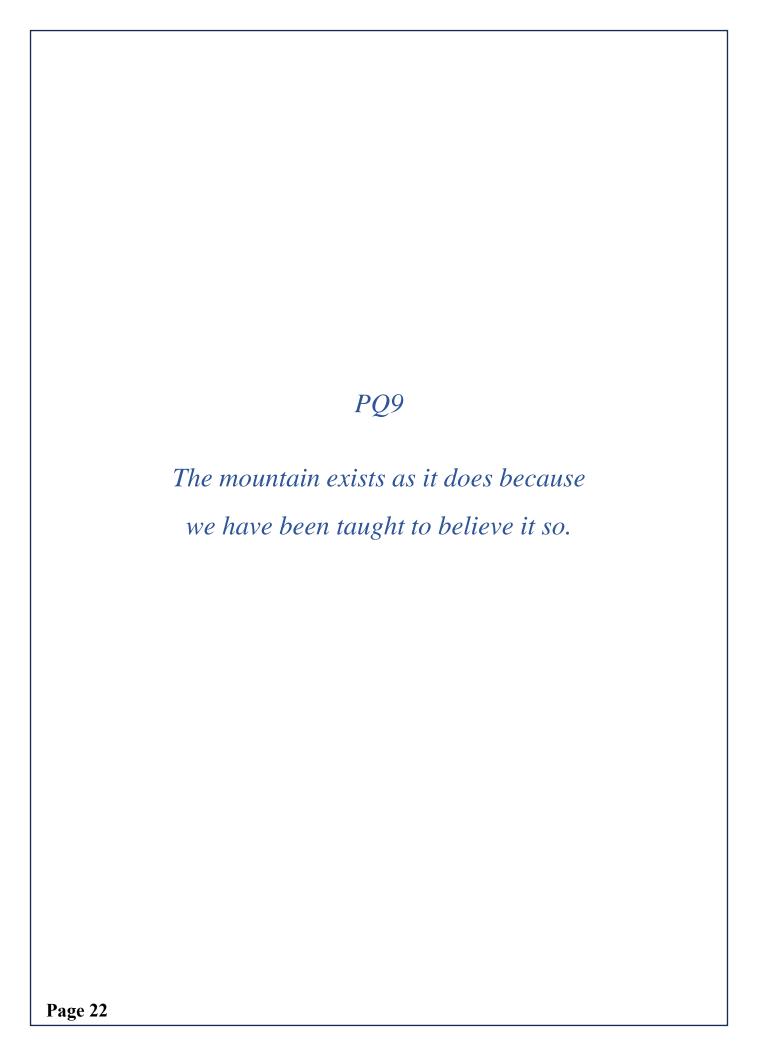

emotional state of being

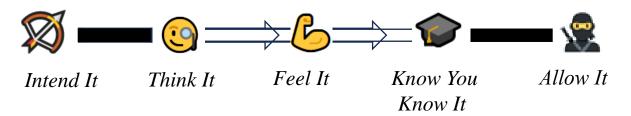

is to ignore one's own

physical and mental health and well-being

with possibly disastrous consequences,

including injury.

Section 1.0: Cognitive-Emotional Intentive Action of Allowing Pre-Test (mark all that apply)

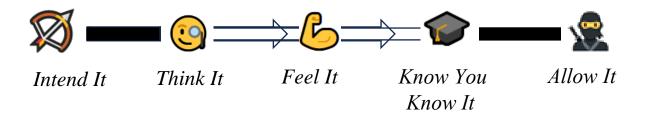

- 1) A bench warmer wants to start in the big game, what do they do?
 - a) Imagine (visualize, hear, smell, and taste) and feel good about starting
 - b) Intend to be the starter
 - c) Re-process emotionally negative cognitions into good-feeling cognitions
 - d) Cheer on the current starters
- 2) Negative, bad-feeling cognitive activities (like not starting) means:
 - a) An athlete's physiology is in a depressed state
 - b) An athlete's physiology is prone to injury
 - c) An athlete cannot perceive the subtleties of the game
 - d) The athlete is hurting their teammates
- 3) What are the some key segments of your position or sport? What do you do at each segment? What is your intention for each segment?

Segment	kick the ball	intention <u>make a goal</u>	
segment		intention	

Personal Power of Qi:

"BAGUBA" Training and Conditioning Manual

Section 1.0: The Actualization Process: Allowing your Intentions

Section 1 is about acting as an individual (or team) with intent, purpose, and awareness to allow the successful actualization of the mechanics and techniques of a move, position, or play in any sport such as in golf, tennis, basketball, baseball, hockey, wrestling, sailing, skiing, or what ever your sport may entail.

Actualization is a process beginning from an overall state of intention (to be victorious) and steps down through the localized segments of intention at each of the various stages (segments) of the competition. A player must cognitively know and emotionally feel (until they know they know) and then "allow" their want, desire, and intent *at each and every stage or segment* within their game, play, move, or "shot" to be successful. Until you "know you know it," you can not "allow it" to happen and be successful. Intend, think, feel, know, and then allow.

PQ10

Each athlete has a responsibility to re-process their own cognitive-emotional behavior into a healthy, more competitive, and better feeling place of strength, speed, power, agility, cunning, and successful decision-making ability.

Intend It Feel It Know You Allow It Think It Know It

1.1 Intend It: The Power of An Athlete's Intent

Which is more powerful?

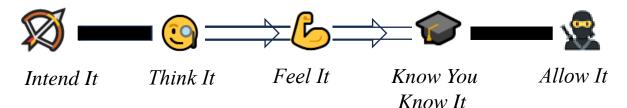

- a) "Visualize a picture of you climbing Mt. Everest" "Visualize a picture of you making a basket"
- b) "My intent is to climb Mt. Everest next May" "My intent is to make this basket"

1.1.1 What is intent?

Intent calibrates an athlete's emotional guidance (the emotional difference between scuba tanks and climbing oxygen cylinders) and sets off a chain of retro-causal events to actualize a future event. Visualization gets you to the door. Intention gets you through the door.

In the blanks below, state what you want, desire, and intend at each segment of a play, move, or assignment. (Do not state what you "do not" want.)

A) Segment of Time :(no	ame of play)
Intention:down b	plock the left guard
B) Segment of Time: <u>(no</u>	ame of play)
Intention: <u>get op</u>	en through a slant route
C) Segment of Time:e	xit after rounding a gate (alpine skiing)
Intention:	
E) Segment of Time:	
Intention:	
F) Segment of Time	
Intention:	Pag

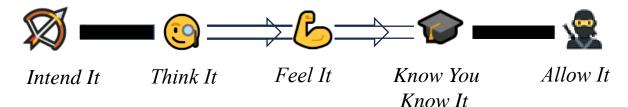

1.2 Think It

Page 26

What are the mechanics/technique of your intent (assignment) you need to remember? This is using your cognitive mind. The mechanics/technique should become automatic through practice and drills. But before they become automatic, there is a thought process involved that must be recognized and acknowledged.

A) Intent: bench press_; what	are the mechanics/techniques?
B) Intent: <u>covering a receiver</u>	; what are the mechanics/techniques?
C) Intent: <u>catching a punt</u>	; what are the mechanics/techniques?
C) Intent: <i>making a basket</i>	; what are the mechanics/techniques?
D) Intent: <i>making a putt</i>	; what are the mechanics/techniques?
E) Intent:	; mechanics/techniques?
F) Intent:	; mechanics/techniques?
G) Intent:	; mechanics/techniques?
H) Intent:	; mechanics/techniques?

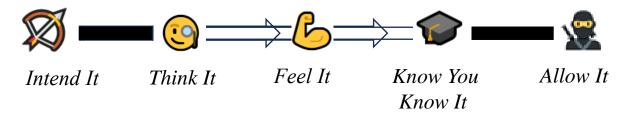

1.3 Feel It

Find the good-feeling place of power. Good feeling emotions, moods, attitudes, and feelings are indications and alignment with a healthy, strong, and robust physiology.

What are the feeling of your intent (assignment)? This is using your emotional awareness. Emotional awareness of the mechanics of your intent should become automatic through your practice and drills. But before they become automatic, there is a process involved that must be recognized and acknowledged to find the good-feelings of success.

1.3.1 If you are lifting weights or	
good feeling place of your intention and YES NO	-
1.3.2 If you are catching a pass orgood feeling place of your intention and t	
S YES NO_	
1.3.3 If you are making a basket or good feeling place of your intention and YES NO	technique?
1.3.4 If you are a making a putt or good feeling place of your intention and YES NO	technique?
1.3.5 NO	Page 2

1.4 Know You Know It.

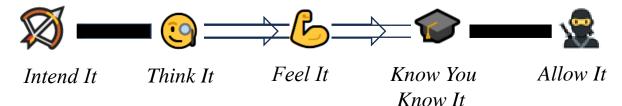

A self-assured, empowered, and combined feeling and knowing of the symbiotic synergy between mind, body, emotions, and consciousness. The feeling/knowing of "know you know it" is something you must seek and find for your self. I can only allude to its existence. "Know you know it" means you will not fail. You are assured of success. You have "written it." How do you describe/feel *your* "knowing of success"?

- a) "I got it"
- b) "mo-jo"
- c) "confidence"
- d) "swagger"
- e) _____
- f) _____
- g) _____

PQ11

If an athlete learns how to harmonize their cognitive activities with their emotions to feel good, they have the capacity to reach through time and space and attract the necessary ingredients and circumstances for their success, including luck.

1.5 : Allow It to Happen.

"It happens" means an athlete is not "forcing" it. They are not "willing it". They are not "demanding it". They are allowing it to happen; like holding your arm out and allowing it to drop by your side.

Allowing "it" to happen means an athlete doesn't have any negative, bad-feeling emotions (resistance) about their desires for a successful and intended outcome.

	a)	What is your intent?
	b)	What is your technique?
	c)	Do you feel it?YesNo
	d)	Do you "know you know" what you are doing?
		YesNo
—	e)	Allow "it" to happen, without thought and effort.
V		Did it "iust happen"? Yes No

Note: At first, running through these processes takes effort and time. But, with practice, the effort and time to go through the steps will become automatic. An observer can watch a star basketball player do a beautiful step-back shot and basket, but the athlete goes through all the steps. They have just become automatic. A similar case is a short-stop in baseball catch a bouncing grounder, wheel around in the air and throw the ball for an out at first. They go though the steps and allow "it" to happen. A slalom alpine skier goes rounds 60gates in 60sec. Each gate has three separate "intentions:" entry, rounding, exit. That is 180 actualization processes in one minute. The mind can't capture that, but an athlete's emotional state can and does "feel it".

Page 29

1.6 Cognitive-Emotional Actualization (Review)

What is your intent? Visualization takes you to the door. Intent gets you through.

Visualization is "picture yourself climbing Mt. Everest". Intent is "My intent is to climb Mt. Everest next May". Intent calibrates your emotional guidance. Feel the emotional difference between scuba tanks and climbing oxygen cylinders. Intent sets off a chain of retro-causal events to actualize a future event.

- Overall Intent: I am climbing Mt. Everest
- Specific Intent: I am obtaining the gear to climb Mt. Everest ii.
- iii. More specific intent: I am getting needed survival gear.

Think It 2)

1)

What are the mechanics of your intent.

- If you are lifting weights, how do you do it? i.
- ii. If you are intercepting a pass, how do you do it?
- iii. If you are catching a punt, how do you do it?
- iv. Breaking through the line; throwing the pass, handing off the ball, blocking, tackling, putting, driving, chipping etc., etc.

3) Feel It

Find the good-feeling place of power.

Good feeling emotions, moods, attitudes, and feelings are indications, and alignment with a healthy, strong, and robust physiology. Find the good feelings emotions, moods, attitudes, and feelings of: lifting weights; intercepting a pass; catching a punt; breaking through the line; throwing the pass; blocking; tackling, putting, driving, chipping etc., etc.

Know you know it.

A self-assured, empowered, and combined feeling and knowing of the symbiotic synergy between mind, body, emotions, and consciousness. "I got it" /"Mo-jo" /"Complete confidence"/ "Its mine"

Allow... it to happen

- i. Do not "force" it. Do not "will" it. Do not "demand" it. "It happens."
- ii. If "it" does not happen, the athlete *has not* resolved their negative, conflictive bad-feeling emotions, moods, or feelings (covered in Section 6).

Intend It

Think It Feel It

Know You Know It

Allow It

1.7 General Offense Worksheet

Section 1.0: Cognitive-Emotional Intentive Action of Allowing Post-Test (mark all that apply)

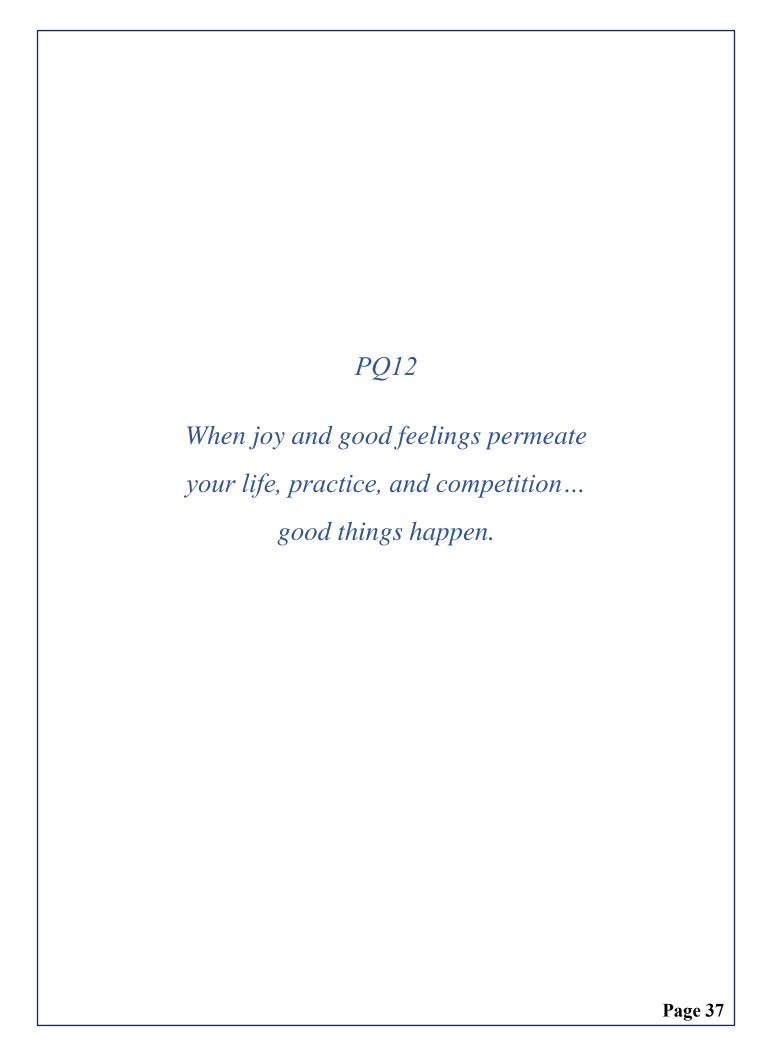

- 1) You want to start in the big game, what do you do?
 - a) Imagine (visualize, hear, smell, and taste) and feel good about starting
 - b) Intend to be the starter
 - c) Re-process emotionally negative cognitions into good-feeling cognitions
 - d) Cheer on the current starters
- 2) Negative, bad-feeling cognitive activities (like not starting) means:
 - a) Your physiology is in a depressed state
 - b) Your physiology is prone to injury
 - c) You cannot perceive the subtleties of the game
 - d) You are hurting your teammates

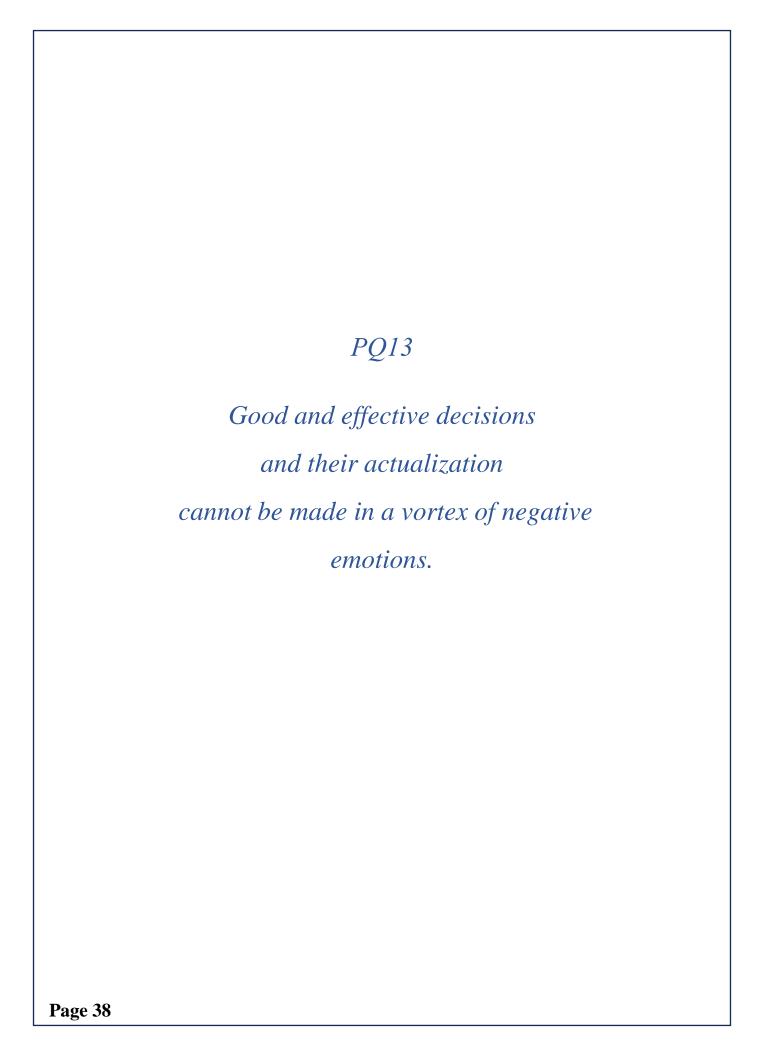

offensive or defensive player? What is your intention for each segment?

Section 2.0: The Symbiotic Synergy Between Mind, Body, Emotions, and Awareness

Pre-Test

(Mark all that apply.)

- 1) Good feeling emotions have an evolved correlation with...
 - a) Power
 - b) Strength
 - c) Weakness
 - d) Cunning
- 2) Bad-feeling emotions have an evolved correlation with...
 - a) Weakness
 - b) Injury
 - c) Poor decision-making
 - d) Strength
- 3) Negative bad-feeling emotions should be controlled, managed, and regulated.
 - a) True
 - b) False
- 4) The adrenalin boost from anger makes an athlete:
 - a) Stronger
 - b) More successful
 - c) Weaker
 - d) Less successful

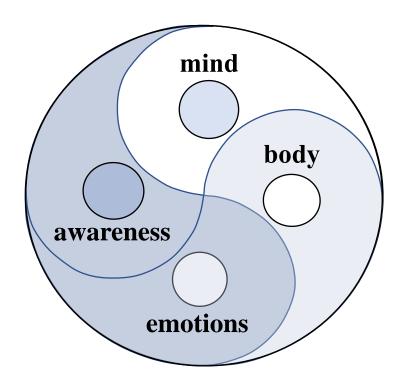

PQ14

To ignore one's own emotional state of being is to ignore one's own physical health and well-being with possibly disastrous consequences, including injury.

Personal Power of Qi:

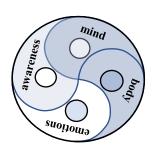

"BAGUBA" Training and Conditioning Manual

Section 2.0: The Symbiotic Synergy Between Mind, Body, Emotions, and Awareness

In **Section 2** the athlete will increase their understanding and power of the symbiotic synergy between mind, body, emotions, and awareness. Mind, body, emotions, and awareness are not separate, individual, and conflicting entities. They are an intertwined web that has evolved to work in synergistic harmony towards individual health, well-being, and successful decision-making prowess, ability (and their actualization).

Emotions have not evolved to be controlled, regulated, and managed by cognition, but to guide cognitive activities towards good-feeling healthy, strong, and robust physiology in the brain and body. Negative, bad-feeling cognitive activities have an evolved correlation with an unhealthy, weak, and frail physiology prone to sickness, injury, and poor decision-making capacity. This is the foundation of today's successful, evidenced based cognitive-behavior modification therapies.

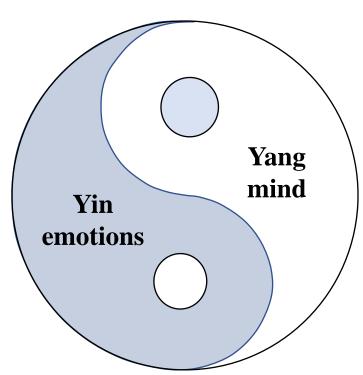

2.1 Emotions

Emotions are the perception of biological changes and states of the brain and body generated by cognitive activities of the mind.

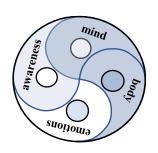

Cognition activities of the mind such as awareness of thoughts, memories, imagination, perceptions, plus reason and logic.

- 2.3 Mind and emotions are not separate but intertwined via the body.
- **2.3.1 Yang:** The mind (cognition) generates changes in the brain and body's biochemical, neurological, and physiological makeup.
 - **2.3.2 Yin**: Emotions are the perception of the brain and body's biochemical, neurological, and physiological makeup.

- **2.4** Emotions, moods, attitudes, and feelings either feel-good or feelbad:
 - 2.4.1 Degrees of feeling-good

Good------Oh WOW

2.4.2 Degrees of feeling-bad

Bad-----suicidal

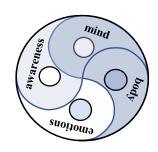

2.4.3 Anger, fear, fury, rage,feel bad but with a last gasp adrenalin boost for survival.

"Feeling bad" emotions, like anger, fear, fury, and rage have an evolved correlation with a temporary powerful (but long-term weakened) physiology of the body and brain. As an evolved *last ditch survival mechanism* (fight, flight, or freeze) the mind injects a powerful adrenalin boost into the body. This provides a short term survival opportunity but in the long run, fear and anger states are harmful to the body and brain and create a negative vortex of behavior and events.

PQ15

Cognitive activities of the mind bring about the physiological changes and states in the brain and body that are consciously perceived as emotions.

2.5 Negative, bad-feeling emotions, moods, attitudes, and feelings have an evolved correlation with disempowerment:

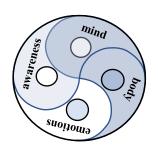

- 2.5.1 Sickness, injury, and poor decision-making
- 2.5.2 Weak physiology
 - a) Biochemistry
 - b) Neurology
 - c) Physiology
- 2.5.3 Ineptness
 - a) Weak, clumsy, slow, lethargic, dull witted,
- 2.5.4 Failure (poor decision-making ability)

PQ16

Bruce Lee never resolved the emotional dissonance brought on by the conflicts within his mind and thus was never able to move beyond the confines of a physical universe and become the master he so desired to be.

2.6 Positive, good-feeling emotions, moods, attitudes, and feelings have an evolved correlation with empowerment:

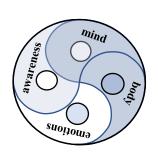

- **2.6.1** Heath, well-being, and successful decision-making
- 2.6.2 Healthy, strong, and powerful physiology
 - a) Biochemistry
 - b) Neurology
 - c) Physiology
- **2.6.3** Powers of
 - a) Strength
 - b) Speed
 - c) Stamina
 - d) Agility
 - e) Cunning
- **2.6.4** Success (successful decision-making ability)

PQ17

Disassociating, ignoring, or camouflaging any unaddressed emotionally negative feelings will be revealed with a substandard performance and, even more dramatically, with an injury.

Page 45

2.7 Disempowering Cognitive Focus

Cognitively focusing or dwelling upon things you do not like, want, or intend have an evolved correlation with dis-empowering, negative, and bad-feeling emotions, moods, attitudes, and feelings.

2.10.3		I imagine something I don't like, I feel: good	_ bad
		are some imaginings that I feel bad about:	
	i	(losing) (blowing a route)	
	ii		
	iii		
2.10.0	6 When	n I imagine something I do like , I feel: good	bad
	What a	are some imaginings that I feel good about:	
	i	(winning) (making a great tackle)	
	ii		
	iii.		
2.10		n I analyze an outcome I don't like , I feel: good	bad
		are some imaginings that I feel bad about:	
	i.	(he blew his route) (he didn't cover his man)	
	ii		
	iii		
2.10	.8 Whe	en I analyze an outcome I do like , I feel: good	bad
	What	are some imaginings that I feel good about:	
	i.	(he ran a great route) (he made a great defensive	play)_
	ii.		
	iii.		

2.11 Emotions & Evolution: emotions have an evolved correlation with physiology such that:

2.11.1 Dis-empowerment:

Negative, bad feeling emotions, moods, attitudes, and feelings have an evolved correlation with the negation of health, well-being, and successful decision-making ability.

2.11.2 Empowerment:

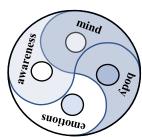

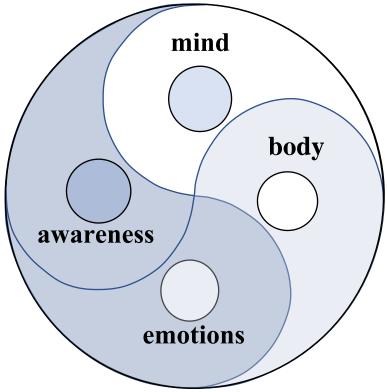

Positive, good feeling emotions, moods, attitudes, and feelings have an evolved correlation with health, well-being, and successful decision-making ability (and their actualization).

PQ18

The habits of thought that supported a reality and cause of misfortune, injury, and loss yesterday; those same habits of thought have the capacity in the brain to change today and to no longer have the capacity to support that unwanted, undesirable, and disharmonious reality and behavior tomorrow.

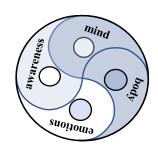

2.12 The symbiotic synergy between mind, body, emotions, and awareness.

That is:

- a) Cognitive activities of the mind
- b) bring about the physiological changes and states
- c) in the brain and body
- c) that drive behavior
- d) and that are consciously perceived as emotions.

PQ19

An individual's outward reality and experience are but a reflection of their inner cognitive-emotional state of being.

Section 2: Mind, Body, Emotions, and Awareness

Post Test

1.	Do you want to achieve and maintain the empowering, positive, and good-				
	feeling emotions, moods, and attitudes of heath, well-being, and successful				
	decision-making?				
	YES NO				
•					
2.	Do you want to achieve and maintain the dis-empowering, negative, and				
	bad-feeling emotions, moods, attitudes, and feelings of sickness, injury,				
	and poor decision-making?				
	YES NO				
3.	What do you do to get out of a negative, destructive, and disempowering				
	state of being and into a positive, constructive, and empowering state of				
	being?				

Cognitive-Emotional Re-Processing

taking disempowering, negative, and bad-feeling thoughts (and other cognitive activities)

and with work

transforming them into empowering, positive, and good-feeling thoughts (and other cognitive activities)

PQ20	
The Mind	
shapes reality;	
Emotions	
indicate the desirability of that shape.	
	Page 53

PQ21

Negative, bad feeling emotions,
moods, attitudes, and feelings have an
evolved correlation with the lack of
health, well-being and effective and
successful decision-making prowess and
their actualization.

Section 3.0: Definitions

Pre-Test

 - reasoning c)
 - imagining d)

Personal Power of Qi:

"BAGUBA" Training and Conditioning Manual

Section 3.0: Definitions

In **Section 3** the athlete will learn about the language of the mind, body, emotions, and awareness. Learning and understanding the language and relationships between the mind, body, and emotions are critical to developing, maintaining, and allowing one's evolutionary powers of strength, speed, stamina, agility, cunning, and success. An athlete assembles their world in a vortex of words and their meaning.

PO22

Do not fixate on the broken and mangled hand, for it is indeed a soreness to any beholder. The message is not within the hand, nor within the moon and stars at which it points, but rather lies within another Universe that surrounds us known only through its quiet revelations.

3.1 Powerful and strong physiology:

Strength, speed, stamina, agility, cunning, and successful decision making ability and the good feelings they bring.

3.2 <u>Compassionate / emotions</u>

Having a cognitive-emotional concern for others and their well-being. This may evolve out of a "selfless" (how it concerns them) or "selfish" (how it concerns me) interest. Good-feeling compassion is empowering. Bad-feeling compassion is dis-empowering.

3.3 Cultivated; wisdom:

wise, educated, refinement

3.4 <u>Cultivated and Compassionate</u>: **\$\square**\$

Awareness and behavior with wisdom and heart and understanding of how "team" and "cooperative" play benefits everyone where "your" well-being is also "my" well-being.

3.5 Intuitive Action of "Mind"

Intuitive action evolves out of cognitive-emotional awareness. "Intuitive action" is not "forced"; an athlete does not "will" it; an athlete does not "demand it:; an athlete 'allows" it to happen. The QB "allowed" the ball to drop into the receivers hands. The basketball player "allowed" the ball to swish the nets.

3.6 <u>Cultivated and Compassionate Intuitive Action</u>:

Allowing action / intuitive action with heart

3.7 Instinctive Reflexive Action of "No-Mind"

Instincts; without thought/mind and emotions; "no-mind", "mindlessness"

3.8 Cultivated and Compassionate Reflexive Action:

Instinctive/reflexive action is cultivated out of the soil of cognitive-emotional intuitive action to carry the fragrance of humanity (to be human) and have a soul.

3.9 Physiology / Physiological:

having to do with the body and how it works (includes neurology and biochemistry)

3.10 Cognition / Cognitive (Mind)

what goes on between the ears

(thoughts, ideas, memories, dreams, thinking, reasoning, perceiving / perception)

3.11 Emotions, moods, attitudes, and feelings:

the perception of physiological (body) states of being

They feel bad

(the perception of a weaken physiology)

OR

They feel good Page 58

(the perception of a strong physiology)

3.12 Cognitive-Emotional

Cognition and Emotions are not separate entities: emotions are the perception of physiological changes and states of the body precipitated by cognition

3.13 Awareness

Conscious; state of being aware; knowledge and understanding that something is happening or exists (Merriam-Webster).

3.14 Meditation:

The purpose of meditation is to quiet the mind (with acceptance and without judgement, desire, wanting, or intent) and to stop the negative and disempowering chatter of the mind. Meditations range from a still mindlessness when focusing on breathing or a candle to a repetitive movement in biking, running, and swimming, to a more intentive motion of forms within yoga, tai-chi, and wushu.

3.15 Mindfulness:

"Mindfulness means living in the present moment. Essentially, it means being (intentionally) more aware and awake to each moment and being fully engaged in what is happening in one's surroundings – with acceptance and without judgment" (https://youmatter.world/).

3.16 Cognitive-Emotional Mindfulness:

Being aware of one's mental activities and corresponding emotional state with judgement, desire, and intent for a better feeling cognitive-emotional state.

3.17 *Vortex*:

Existing in a whirling focus and concentration of thoughts and ideas (that are attracting more and more thoughts and ideas of the same nature) and where any "outside" awareness is limited or non-existent.

3.18 Precipitate / precipitation:

generates, makes, produces, brings on

3.19 Dis-empowerment:

Feeling emotionally bad; the precipitation of an unhealthy, weak, and frail physiology precipitated by dis-empowering cognitive activities.

3.20 Empowerment:

Feeling emotionally good; the precipitation of a healthy, robust, and strong physiology precipitated by empowering cognitive activities.

3.21 Intent, want, desire:

Resolved or determined to do (something) with conviction. Note: intent sets up (or calibrates) the emotional guidance. If you want to climb Mt. Everest, you want climbing oxygen tanks (feels good), not scuba diving tanks (feels bad).

3.22 *Qi (or Chi)*:

Energy. An athlete uses their own thoughts, beliefs and intentions to mold and shape their energy of Qi into their reality.

The cultivation (refinement) of energy.

1+1=2, 3, 4 or even more! "The whole is greater than the sum of the parts."

working in harmony together to create something bigger than you could separately

3.25 Symbiotic Relationship

the mind, body, emotions, and consciousness cooperative and harmonious relationship

3.25 Actualization

realization, to make real.

3.26 Feeling Stick:

feeling good or feeling bad are two ends of the same stick

feels BAD end:

feels GOOD end:

looking at what you don't want (unhealthy physiology)

looking at what you do want (healthy physiology)

3.27 Cognitive-Emotional Re-Processing:

vortex of disempowering, negative, and bad-feeling cognitive activities

WORK

vortex of empowering, positive, and good-feeling cognitive activities

3.28 Cultivated

empowered, disciplined, skilled, trained, successful, compassionate intelligent action and reflexive instincts and intuition; (closed loop process (see section 6.4): capacity to focus and to re-process bad feeling, unhealthy physiology into good feeling and healthy physiology)

3.29 Self-Indulgent

reactionary, undisciplined, impulsive, unruly; focus on what ever comes by (Squirrel!) for good OR bad;

(open loop process (see section 5.1): makes worse existing healthy OR unhealthy cognitive-emotional behavior)

3.30 Pathological

tyrannical, destructive, callous, apathetic (open or closed loop cognitiveemotional apathetic behavior to dominate, control, and self-empower)

3.31 <u>Feed the Beast</u> VS. <u>Feed the Beast</u>

The difference between *feeling good cultivated* intuitive and reflexive action versus *feeling good* self-indulgent intuitive and reflexive action is the difference between being the GOAT and being the Clown.

3.32 Cultivated Actualization Process

acting with intent, purpose, and awareness

Intend It

Think It

Feel It

Know you

Allow It

Know It

"Mind"

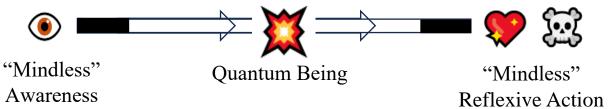

3.33 Gut Awareness and Intuitive Action of "Mind"

An athlete "feels something" in/with their body and the mind interprets that feeling into action.

3.34 "Mindless" Awareness and Reflexive Action of Quantum Being

An athlete "just knows" and "just acts". Instincts; instinctive; reflexive.

3.35 "Quantum Being"

An athlete seemingly existing and performing outside of "normal" time, space, and ability with mindless awareness and reflexive action.

3.36 Personal Power of Qi

With Qi, the mind shapes reality; emotions indicate the desirability of that shape.

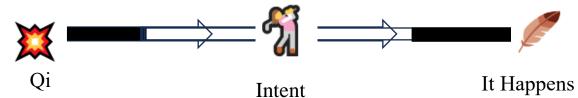

3.37 Mo-Jo, Swagger, In the Flow is Being Lucky and "It Happens."

Page 63

Page 6s	5

PQ24

Disassociating, ignoring, or camouflaging any unaddressed emotionally negative feelings will be revealed with a substandard performance and, even more dramatically, with an injury.

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

Section 4.0: The Power of Emotions, Moods, Attitudes, and Feelings

Pre-Test

capability?

(mark all that apply)

1. Emotions Moods, Attitudes, and feelings: feel bad feel good 1. Emotions are? a. What others are doing to you b. What the world is doing c. What you are doing to yourself d. Is the how you feel about that 2. Negative, bad-feeling emotions, moods, attitudes, and feelings mean: a. Your physiology dis-empowered, weak, and sluggish b. Your physiology is prone to injury c. Your physiology supports good decision-making capacity d. You are hurting your teammates 3. Positive, good-feeling emotions, moods, attitudes, and feelings mean: a. Power b. Strength c. Agility d. Cunning

An athlete can change how they feel, and therefore, their performance

False

True

Personal Power of Qi:

"BAGUBA" Training and Conditioning Manual

Section 4.0: The Power of Emotions, Moods, Attitudes, and Feelings

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

In **Section 4** of this manual, the athlete will learn and understand how good feeling emotional awareness has evolved to correlate with their health, well-being, and successful decision-making physiology of the brain and body.

Emotions, moods, attitudes, and feelings are not about what others and the world are doing "to you." Emotions are about what "you" are doing to "yourself". The athlete will learn and understand how any negative and bad-feeling emotions, moods, attitudes, and feelings like anxiety, depression, nervousness, anger, jealousy, and revenge have an evolved correlation with a dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury). And the athlete will learn and understand how power, strength, speed, stamina, agility, cunning, and success have evolved with positive, good-feeling emotions, moods, attitudes, and feelings.

That is, feeling emotionally good is the perception of a healthy, robust, and empowered physiology of the brain and body (that leads to health, well-being, and successful and effective decision making prowess and ability).

PQ25

The body's movement, motion, and action must feel good to be effective, successful, and repetitive.

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and **injury**).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

4.1 Emotions, Moods, Attitudes, and Feelings

- **4.1.2** Positive, good feeling emotions, moods, attitudes, and feelings have an evolved correlation with:
 - a) health
 - b) well-being, and
 - c) successful decision-making ability
 - d) and their actualization.
- 4.1.2 A healthy physiology means:
 - a) Power
 - b) Strength
 - c) Speed
 - d) Stamina
 - e) Agility
 - f) Cunning
 - g) Success
- **4.1.3** Negative, bad feeling emotions, moods, attitudes, and feelings have an evolved correlation **with the negation** of health, well-being, and successful decision-making ability.
- **4.1.4** If these correlations were not so, humanity would not have survived the evolutionary grindstone to pass on their genes to the next generation.

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and **injury**).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

		Evolutionary Grindstone
Ì		cess, failure, or depends)
a.	i.	feel strong, healthy, and agile AND you are strong healthy and agile: Will you survive when crossing a fast moving stream over the rocks?
	1.	
		Successdepends
	ii.	Will you survive when climbing a tree for fruit or nuts?
		Successdepends
	iii.	Will you survive when hunting across the savannah of Africa?
		Successdepends
b.	If you	feel strong, healthy, and agile BUT you are not strong healthy and agile:
	i.	Will you survive when crossing a fast moving stream over the rocks?
		Successdepends
	ii.	Will you survive when climbing a tree for fruit or nuts?
		Successdepends
	iii.	Will you survive when hunting across the savannahs of Africa?
		Successdepends
c.	If you	do not feel strong, healthy, and agile BUT you are strong healthy and agile:
	i.	Will you attempt to cross a fast moving stream to hunt and gather?
		yesdepends
	ii.	Will you attempt to climb a tree for fruits or nuts?
		yesdepends
	iii.	Will you attempt to hunt across the savannahs of Africa?
Page	70	yesdepends

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and **injury**).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

4.3 The Power of Wanting, Desire, and Intention

4.3.1 Dwelling upon that which you do not want, desire, and intend

generates negative, bad-feeling emotions, mood feelings	ls, attitudes, and
When I dwell or focus on	I feel bad.
4.3.2 Negative, bad-feeling emotions, moods, a have an evolved correlation with an unheaphysiology.	v
When I think about I an	n weakening my body.
4.3.3 Dwelling upon that which you do want, de generates positive and empowered good-fe moods, attitudes, and feelings.	
When I dwell or focus on	I feel good.
4.3.4 Positive and empowered good-feeling emattitudes, and feelings that are indicative of the stamina, agility, cunning, and successful decision needed to thrive within the evolutionary mill.	strength, speed,

To feel-good and to be strong, powerful, and ready for a

competition, I dwell upon _

PQ26 Because joy has an evolved correlation with health, well-being, and successful decisionmaking abilities, we have evolved to be joyous beings.

Page 72

PQ27

Empowerment, health, and well-being with good, successful, and effective decision-making (and their actualization) can only be made in a vortex of positive, good-feeling emotions, moods, attitudes, and feelings.

Section 4.0: The Power of Emotions, Moods, Attitudes, and Feelings

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

of "weakness and failure"

4.4 The Negative, Bad-Feeling Vortex of Weakness

Empowerment, health, and well-being with good, successful, and effective decision-making (and their actualization) CANNOT BE **MADE** in a vortex of negative, bad-feeling emotions, moods, attitudes, and feelings (that have an evolved correlation with a weak, unbalanced, and sluggish physiology of the brain and body).

of "power and success"

4.5 The Positive, Good-Feeling Vortex of Power

Empowerment, health, and well-being with good, successful, and effective decision-making (and their actualization) CAN ONLY **BE MADE** in a vortex of positive, good-feeling emotions, moods, attitudes, and feelings (that have an evolved correlation with strong, balanced, and vigorous physiology of the brain and body).

Section 4.0: The Power of Emotions, Moods, Attitudes, and Feelings

Feeling-bad emotions, moods, attitudes and feelings have an evolved correlation with dis-empowering, weak, and sluggish physiology of the brain and body (that leads to poor decision-making, performance, and injury).

Feeling-good emotions, moods, attitudes and feelings have an evolved correlation with empowered, robust, and healthy physiology of the brain and body (that leads to strength, speed, stamina, agility, cunning, and successful decision-making).

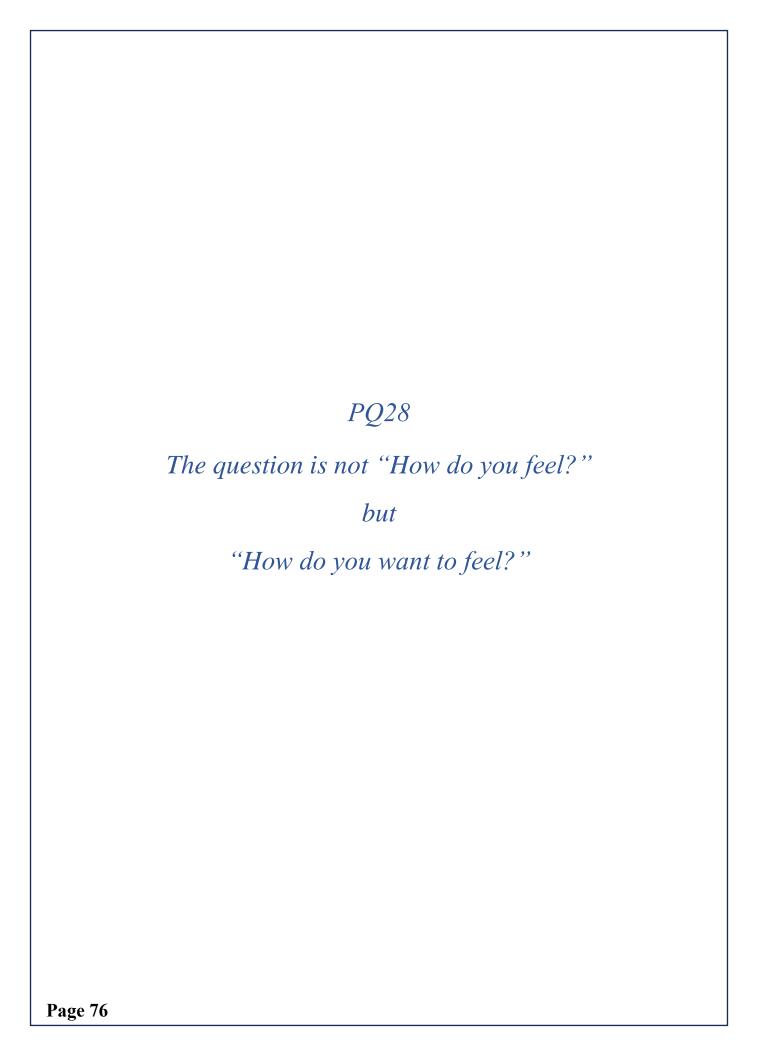

Section 4.0: The Power of Emotions, Moods, Attitudes, and Feelings

Post Test

(mark all that apply)

- 1. Emotions are the perception of the physiology of the brain and body.
 - a. True
 - b. False

2.	Empowerment, health, and well-being with good, successful, and effective decision-making (and their actualization)
	cannot be madecan only be made
	in a vortex of negative, bad-feeling emotions, moods, attitudes, and feelings.
3.	Empowerment, health, and well-being with good, successful, and effective decision-making (and their actualization)
	cannot be madecan only be made
	in a vortex of positive, good-feeling emotions, moods, attitudes, and feelings.

PQ29 Intent, free from conflict, bias, and discord, allows a complementary rendezvous of people, places, and events.

PQ30

A person who never resolves the emotional dissonance brought on by the conflicts within their mind will never find the internal peace and harmony needed to move beyond the confines of a physical universe of objects and linear cause and effect and reach their power that exists within.

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

Section 5.0: Cognitive Behavior Precipitates Changes and States of Physiology in the Brain and Body

Pre-Test

(mark all that apply)

1.	Emotions change the pl	nysiology that drive	es behavior
	true	false	depend

- 2. "Cognitive" activities of the mind include:
 - a. Thinking
 - b. Imagination
 - c. Reasoning
 - d. Sensory Perceptions
- 3. Cognition and cognitive activities of the mind generate the physiology of the brain and body perceived as emotions.
 - a. True
 - b. False
- 4. Negative, down-feeling cognitive activities (like not starting) means:
 - a. Your physiology is in a depressed state
 - b. Your physiology is prone to injury
 - c. You cannot perceive the subtleties of the game
 - d. You are hurting your teammates
- 5. Feeling good when cheering on and encouraging the starters means:
 - a. You are empowering your own physiological being
 - b. You are more aware of what is going on around you
 - c. You are creating a more powerful team
 - d. You are hurting your chances of starting

Personal Power of Qi:

"BAGUBA" Training and Conditioning Manual

Section 5.0: Cognitive Behavior Precipitates Changes and States of Physiology

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

In **Section 5** of this manual, each athlete will learn and understand that disempowering cognitive activities of the brain (thoughts, ideas, memories, dreams, thinking, reasoning, perceiving / perception) precipitate the changes and states of physiology in the brain and body that are perceived as bad-feeling emotions, moods, attitudes, and feelings. Conversely, empowering cognitive activities precipitate the changes and states of physiology in the brain and body that are perceived as goodfeeling emotions, moods, attitudes, and feelings. Disempowering, negative, and badfeelings (that are indicative of a unhealthy physiology vanish when the athlete focuses on empowering cognitive thoughts and activities that are indicative of a healthy physiology.

5.1 Cognition

Cognition are activities of the mind, that is, what goes on between the ears. Cognitive activities include an athletes thoughts, ideas, memories, dreams, thinking, reasoning, and perceiving and perception.

5.2 Physiology / Physiological:

Physiology means having to do with the body and how it works.

And biochemistry (having to do with the chemicals of the body and brain).

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

Actio	on from a negative, bad-feelin	g place has power and strength.
-	True	False
5.3.1	Because cognition precipitate and states of being that is per (not emotion) drives behavior	rceived as emotion, cognition
If I wa	ant to change how I feel, I mu	st change my thoughts.
-	True	False
5.3.2		ior as you read in books, hear movies, TV, and videos. Emotions e cause.
If the	movie I am watching is depre	essing, I can change the channel.
	True	False
5.3.3		-processing of disempowering, feeling cognitive activities into
		althy good-feeling cognitive activities.
•	empowering, positive, and he	althy good-feeling cognitive activities. an be used to find positive good-

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.4	Emotions have evolved to be trusted in symbiotic harmony
	with mind, body, emotions, and consciousness and to guide
	and re-process cognitive behavior towards the joyous, good
	feeling emotions, moods, attitudes, and feelings.
тст	have a have a habit of thinking negative had faciling the walts

If I have a have a habit of thinking negative, bad-feeling thoughts, I can easily just stuff them.

True	False

5.4.1 Good-feeling emotions, moods, attitudes, and feelings are indicative of health, well-being, and successful decisionmaking prowess (and their actualization).

Feeling bad because I am behind in the score will help me win.

5.4.2 An individual or athlete's physiological capacity to succeed in sports or in life correlates with their cognitive-emotional skills, tools, and understandings to re-process, re-structure, and re-organize dis-empowering, negative, and bad feeling cognitive behavior into empowering, positive, and goodfeeling cognitive activities (see Section 6).

I have the wisdom, skills, and ability to change my thoughts to a better-feeling, healthier, and stronger place.

Page 82	True	False

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

"Vortex of More Success"

"Vortex of More Failure"

Focus on successful play calls or scheme, great routes, effective blocking, good tackling, bewildering runs, pinpoint passing creates a vortex of more power and success. Focus on a dropped ball, missed tackle, fumble, missed block, penalty, interception, blown coverage creates a vortex of more mistakes, errors, and failure.

- 5.5 What you are getting.... comes from your vortex..... of what you are thinking and what you are feeling.
 - a) What are you getting? What is happening "to you" on the field?

i. _____

b) What are you thinking? What are you focusing on?

i. _____

c) What are you feeling? (Your power is NOT in a place of negative, bad-feelings, and focus on what is "not wanted".)

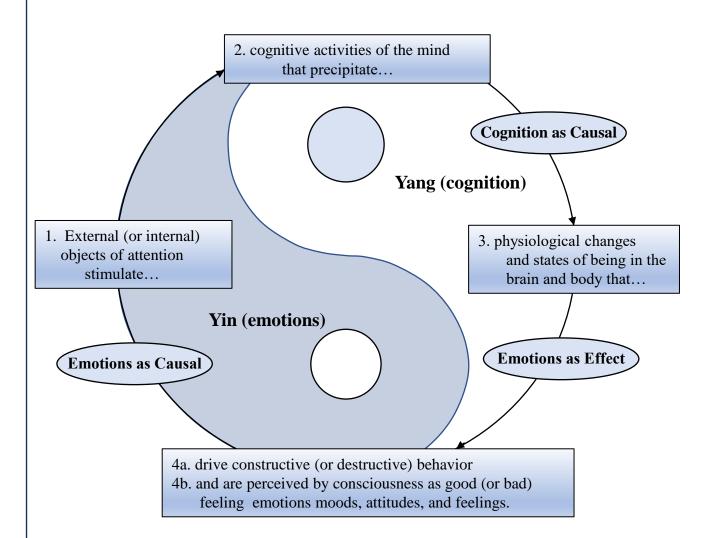

i. _____

d) Where is **your** place of power? Where is your focus when feeling good?

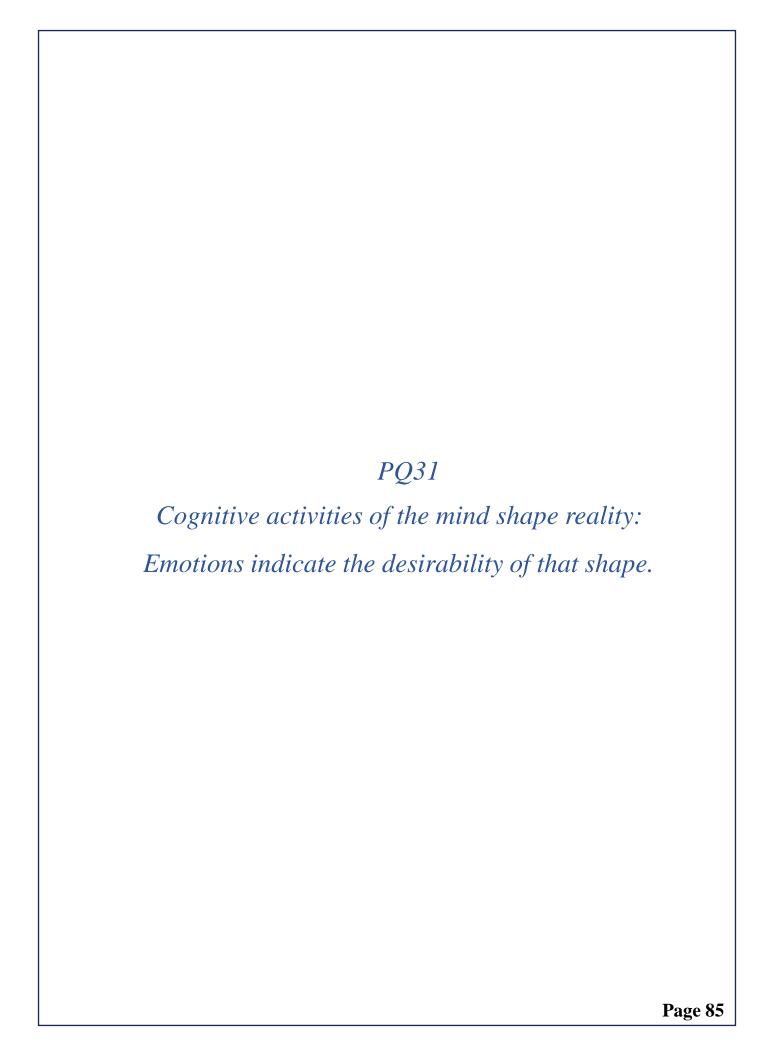

i.

5.6 Self-Absorbed (Open-Loop) Cognitive-Emotional Process Flow Chart

- **5.6.1** Dwelling upon that which you do not want, desire, and intend generates negative, bad-feeling emotions, moods, attitudes, and feelings that have an evolved correlation with an unhealthy and depressed physiology vulnerable to sickness, injury, and ineffective and poor decision-making.
- 5.6.2 Dwelling upon that which you do want, desire, and intend generates positive, good-feeling emotions, moods, attitudes, and feelings that have an evolved correlation with a healthy and powerful physiology that supports effective and successful decision-making prowess and abilities.

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.7 Building Confidence and Determination: Managing Performance Anxiety

,	·	g about your performance capabilities.
Do I "knov	w I know" what my coach	has taught me.
	_Yes, I can "feel it"	No, I don't know the "feeling"
,	and focus within your pla eeling of success.	ce of power: confidence, swager, knowing,
•	nto my place of POWER, S G, AND SUCCESS!	STRENGTH, SPPED, AGILLITY,
	_Yes, I can "feel it"	No, I don't know the "feeling"
c) Play v	within your capacity. Tryin	g to do more means a focus within lack.
	_Yes, I can "feel it"	No, I don't know the "feeling"
	•	ons or get good results from a negative feeling late your teammates success
	_Yes, I can "feel it"	No, I don't know the "feeling"
	en feeling the emotionally to get your mind into a be	negativity STOP your thoughts and do tter, good-feeling place

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.8 Short Memory vs. The Power of Focus.

Your power is in your ability to focus on what is wanted. A "short memory" negates the power of negative thinking in understanding and clarifying that which you do not want, desire, or intend. Then a new vortex of thoughts, ideas, and perceptions builds up and becomes more powerful when now focusing on that which is wanted, desired, and intended.

a)	What are you getting? What is happening "to you" on the field?
	i
b)	What are you thinking? What are you focusing on?
	i
	What are you feeling? (Your power is NOT in a place of negative, bad lings, and focus on what is "not wanted".)
	i
d) god	Where is your place of power? Where is your focus when feeling od?
	i.

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.9 Focus in a Prevent Offense/Defense

The reason that a prevent offense/defense doesn't work is because of a focus on that which is not wanted....on what you want to prevent. A prevent offense/defense will work if the players focus on what is wanted, desired, and intended. That is, is a defensive back focused on preventing the receiver from "catching the ball" or on "knocking the ball down." Is a quarterback focused on not "throwing an interception" or "completing a pass". Is the offense and defensive coordinators focused on not "losing" or on "winning."

a)	What are you getting? What is happening "to you" on the field?
	i
b) '	What are you thinking? What are you focusing on?
	i
	What are you feeling? (Your power is NOT in a place of negative, feelings, and focus on what is "not wanted".)
	i
d) good	Where is your place of power? Where is your focus when feeling 1?
	i

PQ32
Visualization takes you to the basket, Cognitive-emotional actualization makes the basket.
Page 89

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.10 Playing to Win vs Playing Not to Lose

Again, where is your focus? A focus of "not losing" creates a vortex of thoughts, perceptions, and imagery of losing within a weak and disempowering physiology. If your intent is "to win", then your thoughts, perceptions, and imagery should be around the good-feelings of success and the associating and empowering physiology of strength, power, and imagery of success .

a)	What are you getting? What is happening "to you" on the field?
	i
b)	What are you thinking? What are you focusing on?
	i
,	What are you feeling? (Your power is NOT in a place of negative, l-feelings, and focus on what is "not wanted".)
	i
d) god	Where is your place of power? Where is your focus when feeling od?
	i

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.11 Fumble-itis, Interception-itis, Drop-itis, and Turn-Over Can't Make a Basket-itis

Focus, focus, focus.... on that which is wanted, desired, and intended! Is the athlete focused on the positive and empowering good feelings of "securing the ball" or on the negative and disempowering bad-feelings of "not fumbling"? The same is for the quarterback, receiver, defensive lineman or for any other member of the team and the team as a whole. Where is their power of focus? Is it within the negative, bad-feeling, and disempowering physiology of what they "don't want" or on good-feeling and empowering physiology of what they "do want"?

a)	What are you getting? What is happening "to you" on the field?
	i
b)	What are you thinking? What are you focusing on?
	i
	What are you feeling? (Your power is NOT in a place of negative, l-feelings, and focus on what is "not wanted".)
	i
ŕ	Where is your place of power? Where is your focus when ling good?
	i.

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.12 Play Within Your Parameters (Skill and Ability Level)

Trying and attempting to play beyond your abilities and what your coach has asked of you is to bring into play the focus of lack of "not good enough", that is, that you do not have the capacity to do your job. This focus on lack and inability only diminishes further your capabilities. Focus on lack and the negative, bad-feeling emotions are indications of a depressed and weakened physiology prone to injury and poor decision-making capability.

Now, this is all reversed if your coach's challenge motivates you into a challenging, good-feeling and excitement of doing more. The empowering, good-feelings are indications of an empowered physiology and a focus on that which is wanted, desired, and intended.

a) What are you getting? What is happening "to you" on the field?
i
b) What are you thinking? What are you focusing on?
i
c) What are you feeling? (Your power is NOT in a place of negative, bad-feelings, and focus on what is "not wanted".)
i
d) Where is your place of power? Where is your focus when
feeling good?
i.

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

Activities of the mind precipitate the changes and states of physiology perceived as good-feeling emotions, moods, attitudes, and feelings.

5.13 Managing Disappointment of a Play, Practice, or Game

Within the excitement and anticipation of a play, practice, or game lies an empowered physiology of strength, cunning, and capacity to perform. Any mishap, hiccup, or screw-up must be seen as an opportunity to re-focus on your task at hand with a new determination. Again, focus, focus, focus.... on that which is wanted, desired, and intended. Where is your power? Is it within the negative, bad-feeling, and disempowering physiology of what you "do not want" or is it within the good-feeling and empowering physiology of what you "do want"?

a)	What are you getting? What is happening "to you" on the field
	i
b)	What are you thinking? What are you focusing on?
	i
	What are you feeling? (Your power is NOT in a place of gative, bad-feelings, and focus on what is "not wanted".)
	i
-	Where is your place of power? Where is your focus when ling good?
	i.

Page 94

Activities of the mind precipitate the changes and states of physiology perceived as bad-feeling emotions, moods, attitudes, and feelings.

	Before practice:
	Before a competition:
	During a time-out, half-time

PQ40

Dwelling upon that which you do want, desire, and intend generates positive and empowered goodfeeling emotions, moods, attitudes, and feelings that are indicative of the strength, speed, stamina, agility, cunning, and successful decision-making prowess needed to thrive on the field of sports competition and in life.

POA1
PQ41
Each person has a responsibility to re-process their
own cognitive-emotional behavior into a healthy,
more competitive, and better feeling place.
Page 112

Section 7: Gut Awareness and Reflexive Action of Mind

Pre-Test 1. An athlete can create their own luck. True False 2. An athlete can intuitively be in the right spot at the right time doing the right thing. True False 4. An athlete must control and manage their emotions. True False 5. Emotions, moods, and attitudes tell an athlete important information about their cognitive activities. True False An athlete must have good emotional feelings associated with 6. their wants, desires, and intentions to be successful. False True

PQ42

Enjoying life (and the competitive game) is necessary for the actualization of that which is

wanted, desired, and intended.

Personal Power of Qi:

"BAGUBA" Training and Conditioning Manual

Section 7.0:
Gut Awareness and Intuitive Action of "Mind"

In **Section 7** the athlete will increase their power of intuitive awareness from the perception of emotions, "feelings" and other senses (with the interpretive power of "mind") to maximize competitive performance and to prevent injuries.

"While living in El Paso, TX, I went into the shower to clean off the desert grime. Something was wrong. I smelled the presence of death. Immediately I froze. I turned to my right and there I was naked and eyeball to eyeball with a scorpion."

A player cannot know (or act on) the subtleties playing out within the game if they are (1) camouflaging their emotional state with mental chatter, (2) actively suppressing, ignoring, or controlling their emotional state of being, or (3) preoccupied by being mindfully aware with "acceptance and without judgment". Emotions have evolutionary survival meaning and have a cooperative relationship with "mind" in competition for success.

PQ43

Emotions, attitudes, moods, and feelings are leading indicators of the desirability (or un-desirability) of a coming rendezvous of people, places, and events.

7.1 Gut Awareness and Intuitive Action

7.1.1 Feel

With a calm and highly aware mental state, an athlete can feel the subtle emotional energies through-out their body. Learn what body feelings go with what thoughts of awareness and their meaning.

7.1.2 Cultivated Intuitive Action

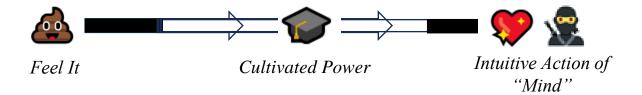

When an athlete get an impulse of knowing or awareness, the difficulty is learning to give it an appropriate value. Is "this" something to act on "NOW!" or is "this" not quite yet understandable. But with practice, an athlete will develop confidence and their "knowing" will guide them to be in the right spot at the right time.

7.1.3 Cultivated Intuitive Action

I was driving on Mexico's back roads after dark on a very stormy night. We had separated from the caravan several days earlier to adventure on our own. Now we had to rendezvous with the group before morning at a soccer field in a major city to continue our tour together. I had these feelings of where the field was and how to get there. "Turn right here." "Turn left there." "Take this road." "Now the field will be on your right".

Describe 2 events where you had "feelings" of where to go and what to do.

1	 	 	
2.			

7.2 Camouflaging, suppressing, or ignoring emotional states of being

- 7.2.1 If an athletic is camouflaging their emotions by suppressing and ignoring their emotional state of being they cannot know or act on the subtleties playing out within the game. Stuffing emotional awareness does not mean an athlete has a quiet mind and heart. Rather it prevents them from hearing the quieter fluctuations in their emotions.
- 7.2.2 "Feeling "that something is off" or I "feel something is afoot" can only be processed into a "knowing" if you are "feeling."
- 7.2.3 The skill of quietly feeling that something is off is being aware and to know what is happening. And then act on that knowing.

7.2.4 *The importance of negative emotional awareness.*

We were canoeing and camping for a week in the Boundary Waters Canoe Area of northern Minnesota. The day was late with a long day of paddling and we needed to find a camp site. Paddling up to an available site, I felt uneasy about stopping here. But we were both too tired to adventure further. Setting up camp was going well when I heard a "pop" and an "oh, sh**" and I looked up just in time to see a fiberglass tent pole spinning 20feet into the air, out over the water, and splash.

Describe an event in life or in a competition where you "felt uneasy":			
How did you act on that feeling?			

7.3 Feed the Beast

VS. <u>Feed the Beast</u>

7.3.1 Be the Wounded Hero

Now if an athlete is dominating, not because they are allowing the flow of Qi through their body, but because they start "pushing" themselves through negative, bad-feeling cognitive-emotional resistance, or forcing themselves to play beyond their natural capacity "for the team", then accidents, and injuries are more likely to occur. These athletes need a time out.

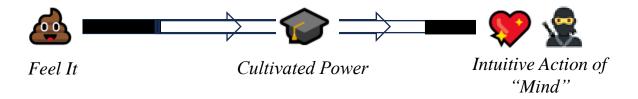

Describe a time when	you had a	n injury.	Can you	interpret	what your	cognitive-
emotional state was?						

Another cause of injury is by being emotionally negative, up-set, depressed, or angry. An athlete can also be cognitive-emotionally "somewhere else" and not ready for competition. The physiology of the body is not at its natural peak for physical adversity.

Describe a time when you had an injury. Can you interpret what your cognitiveemotional state was?

PQ44

An individual's outward reality and experience are but a reflection of their inner cognitive-emotional state of being Page 117

7.3.2 Be the Fool (or the Jester?)

Then there is the manic high of the clown. The athlete's good feeling reflexes and intuitive actions are from a self-important high. The good feelings come **NOT** from a cultivated intent of a successful action like, "Make this basket."; "Make this catch."; "Make this putt.": "Make this block."; but from a pathological intent of how others will see me as "Being a hero".

But, the jester in medieval times had the role of cheering up the King, of distracting him from the woes of the day. The jester had a purpose to help the King get out of the vortex and attraction of negativity and into the vortex and attraction of positive, good feeling events, circumstances, and people. The line between the Clown and the Jester is very delicate and to error could be very costly. But the benefits could mean a rejuvenation of a successful competition.

to success?	·		

Describe a time when you showed off. Did it energize the audience and the team

P45

Be able to reimagine and recreate your best performance for another, repeat "best performance"!!!

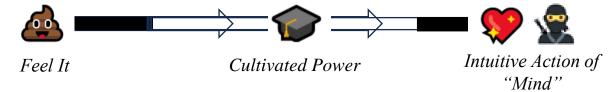

7.3.3 Be the Goat

The difference between *feeling good cultivated* intuitive and reflexive action versus *feeling good self-indulgent* intuitive and reflexive action is the difference between being the *GOAT* and being the *Clown*. Cultivated action starts with an intent to succeed and to make the perfect play, move, or shot, for the reward of its accomplishment for "me" and "the team". Self-indulgent, self-important intent and action is to highlight just "*ME*".

Describe an event at home, practice, or in a competition where you had the energy and/or skill and made a fantastic "TOP 10" play.

What was the event?	
What were the surroundings? People? Place?	
What was going on in your mind?	
What did you sense, smell, taste, or perceive that you can associate with the "T 10" performance?	Гор
What did you feel? Before:	
During: After:

PQ46

When an athlete takes the time and effort to emotionally feel good, they are allowing a synergistic harmony of the mind, body, and consciousness that then has the capacity to respond to the demands needed for those extraordinary performances required in competition.

Section 8: "Mindless" Awareness and Reflexive Action of Quantum Being

Pre-Test (mark all that apply) 1. "Mindless" awareness and action are a product of "Quantum Being". False True "Mindless" awareness and action exist beyond the boring world 2. of time, space, and physical daily life. True False An "empty mind" is in a state of awareness. 3. False True An "empty mind" is a state of action. 4. False True "Mindless reflex" is another term for "instinct." 5.

False

True

Personal Power of Qi:

"BAGUBA" Training and Conditioning Manual

Section 8.0: "Mindless" Awareness and Reflexive Action Of Quantum Being

In **Section 8** the athlete will increase their power of "mindless" awareness and action to maximize competitive performance and to prevent injuries.

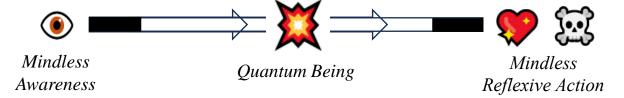

"As a child I was working in the fields with my father when he looked up at the sky. He had "heard" some geese. As a lifelong birder this would be normal. But I heard nothing. After several minutes past, the geese and their distinctive "honking" came into my awareness."

"I was in a wrestling match I was supposed to win. Action stopped with 10 seconds to go and I was 1pt behind. I was on top. Again I thought, "I am supposed to win this match!" The whistle blew and my mind went blank. My body just acted on its own.... cross-body ride, thrust forward, chicken wing his arm to a near fall....2pts."

"Mindless" awareness and action revolve around the exciting constructs of "Personal Power of Qi", "Quantum Being" and "Follow Your Passion" which exist beyond our normal time, space, and physical worlds of boring daily life.

PQ48

If an athlete learns how to harmonize their cognitive activities with their emotions to feel good, they have the capacity to reach through time and space and attract the necessary ingredients and circumstances for their success, including luck.

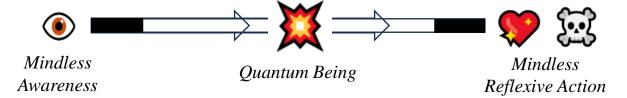

I felt that today was special. I could feel it. Several of us ski instructors piled snow up and made a jump. I was going to do my first flip on snow skis. I *just knew* I could do it. On the run to the jump, my mind went blank and I launched myself into the air, did a single forward flip, and landed cleanly. I came back to reality and whooped with joy. I had done it!

8.1 Reflexive Action of "No-Mind"

The process of using your natural reflexes and intuitive action of "No-Mind" is to be highly sensitive and aware (without thought and emotion) of the events going around you in a game and specifically during a play. Then your emotional awareness can "speak" to you on the significance and meaning of your cognitive activities.

- 8.1.1 Consciousness can not be fully aware of all the thoughts, memories, plans, and training that you have learned over your years in a sport. But your emotions can tell if your cognitive activities are in alignment (or not) with intent.
- **8.1.2** You can not be aware and act upon the subtleties playing out in the the events around you if your gut is focused in anger, jealousy, revenge, or any other powerful good or bad feeling emotions, moods, and feeling.
- 8.1.3 Once the mind and emotions are quiet of all their "louder chatter", you can *hear*, *smell*, or *feel* your cognitive-emotional signals.
 - a. I "feel something"
 - b. Something is "off"
 - c. I can feel in my gut that I need to act.

8.2 "Mindless Action" of Quantum Being

"In wrestling, we had a drill called "King of the Mat." A wrestler stayed "in" wrestling all the wrestlers round-robin, one by one, in his group until he lost. Then a new king was crowned, and they stayed in until they lost. One practice, I was hot! And as the "King of the Mat" drill progressed, instead of tiring out and getting weaker, I got more and more energy and was getting stronger, faster, and more dominating with every move. I wore out every challenger from all weight classes, including our 3x, undefeated state champion. Once upon a time, that one day, I was feeling it; I was feeling good; I was connected; I was hot; I was "The King"; "The GOAT".

1.	Describe an event at home, practice, or in a competition where you had an "unreal" amount of energy and/or skill.
2.	What were the surroundings? People? Place?
3.	What did you feel?
I	Before:
I	Ouring:
I	After:
4.	How will you get into that "place" in the future?

8.3 Swagger; Being Lucky; Being in the Flow; "It Happens."

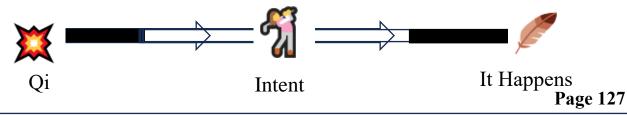

"I was on our middle school basketball team playing our un-beatable nemeses. We were down one, with little time on the clock, and our star missed his shot and we lost the rebound. I was tripping over my loose shoe laces and stopped to tie my shoe as the others scurried down to the other end. I looked up. They also missed and we got the rebound. There I was under the basket to receive a long pass for a winning layup (Luck). I missed that layup three times before I was tied up and game over (Unlucky). Later, I was teased endlessly. In high school I became a wrestler."

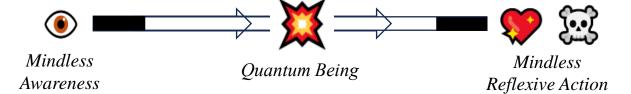

8.3.1 Luck is being at the right place at the right time for the rebound, fumble, basket, penalty call.... to go "your" way. Subtle cognitive-emotional messages of *being connected*, *lucky*, *and in the flow* can readily be seen in soccer. How did a striker just happen to be in the right place at the right time for some "errant" ball to land at their feet where they can effortlessly kick it for a goal. Or how about a half-court "buzzer beater." Or an eagle in golf. "Miraculous" plays that "just happen" and are seen every week.

An athlete must take credit for "luck" and "being lucky" because they did something very important... *they intended and allowed success to happen*. They didn't force it. They didn't have conflicting cognitive-emotional activities. It didn't "just happen." They intended success to happen with no belief (at that very moment) that it would not happen.

Describe a time or event you were "lucky."

8.3.2 All things being equal, the person (or team) who builds and maintains their own cognitive-emotional knowing and good feeling of well-being and success will win because they are allowing the events, conditions, and circumstances of their intent.

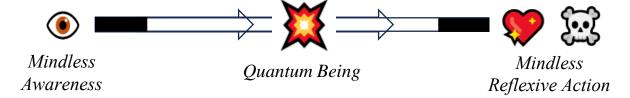

8.4 Building Team Qi and a reality vortex of SUCCESS.

8.4.1 The significance of passing the ball, puck, or pearl in basketball, soccer,

team when building their own vorte competition in a "hole' and from re-	n of your own reality of success! Also, the ex of success, that vortex keeps the alizing their own reality of success. When each other as an <i>affirmation of your reality</i> ,
"This is our victory"	
"This is our court" (ev	en if away game);
"We dominate"	
"Our success"	
"Our win"	
"Our house and our ba	11"
(and it doesn't bounce	e randomly, it bounces to us!)
Make up some affirmations you and (puck), or during a drill, play, move	d your team can use when passing the ball e, etc.
•	ll and softball teams exhibit a huge amount of spirit. What can your team do to uplift each
yours	theirs

yours

Page 128

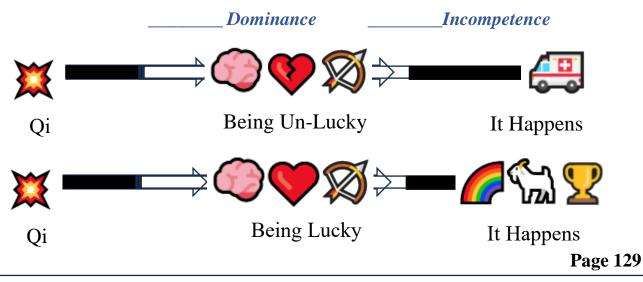

8.5 Affirming a REALITY of success:

(Hear, see, feel, smell, touch, and taste "IT")

When a basketball player makes a 3pt shot, they usually affirm their reality and feeling of success with a "3 finger salute." An alpine ski racer can affirm the feeling of success with each hit of a gate. In your sport, how do you affirm your (goal, basket, shot, etc.) feeling and knowing of success?

In the actual competition? _____Yes _____No

Many time in basketball pregame warmups players are "just shooting the ball" seemingly without any actual resolve or intent for success. Are they affirming success or failure? This is the time for extreme mental discipline, to get "into the zone", "feeling "it", and getting into the cognitive-emotional place of success. Pre-game/pre-race warmup is the time to establish one's own and the team's symbiotic and internal cognitive-emotional dominance, confidence, and belief needed on the competitive field of play. During the very first few moments of a competition, are you performing with dominance or incompetence?

8.6 Learn to Be Successful

8.6.1 Synchronicity

Positive, good-feeling cognitive-emotional activities allow the rendezvous of people, places, and events in harmony with your intent.

8.6.2 <u>Cognitive-Emotional Awareness:</u>

The mind shapes reality. Emotions indicate the desirability of that shape.

8.6.3 Champions Project Success:

In sport or in life, champions prevail because their cognitive-emotional projection of reality becomes dominant and prohibits the competition from seeing the reality of their own success.

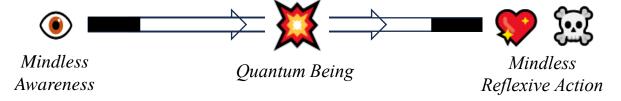

8.6.4 Intent, want, desire:

Resolve and determine to be successful. Note: intent sets up (or calibrates) the emotional guidance. If you want to climb Mt. Everest, you want climbing oxygen tanks (feels good), not scuba diving tanks (feels bad).

8.6 Learn to Be Successful (continued)

8.6.5 Synergy Relationship:

1+1=2, 3, 4 or even more! "The whole is greater than the sum of the parts." Learn the joy of working in harmony together to create something bigger than you could separately.

8.6.6 Symbiotic Relationship

Understand and utilize the mind, body, emotions, and consciousness cooperative and harmonious relationship. An athlete has their own internal "I" team to bring together for a fantastic and triumphant performance.

8.6.7 An individual's outward reality and experience are but a reflection of their inner cognitive-emotional state of being.

8.6.8 Success is a state of being.

Section 8: Mindless Awareness and Reflexive Action of Quantum Being

Post-Test (mark all that apply) An athlete must cognitively know and understand "reality" to be 1. successful? False True An Olympic 100m runner was disqualified for anticipating the 2. gun because the "computer" said he left the blocks too soon. Was he anticipating the gun or had he heard the gun? _____ Anticipating Heard Can a defensive player "know" where the play is going before the 3. offensive player? No Yes____ 4. An athlete can create their own luck. True False An athlete can intuitively be in the right spot and the right time 5. doing the right thing. False True Do you, as an athlete, "know you know" you are a successful 6. being in all your adventures? Can you "feel it" in your bones?

Page 132

PQ49
Cognitive activities of the mind bring about the
physiological changes in the brain and body that
drive behavior and are consciously perceived as
emotions
Page 133

Appendix A:

Offense Actualization Play Sheet (Segment Intending)

On the top, name the play, move, or action (making a put, goal, shooting jump shot, kicking the ball, catching and throwing the ball, rounding a gate, etc.) in your sport. Then use following sections to break each offensive play or move into its segments and state the intent and the success (or not) of allowing of each segment.

PQ49

The success of any athletic training cannot be defined solely by the athlete's ability to win today; success must be defined by the athlete's ability to achieve with the presence of health, vigor, and joy along with the necessary cognitive skills, abilities, and motivation to nurture these winning behaviors throughout life by employing one's own evolved cognitive-emotional re-processing mechanisms.

Appendix B:

Defense Actualization Play Sheet

(Segment Awareness)

On the top, name the defensive play, move, or action to prevent a goal, tackle, jump shot, kick, etc. in your sport. Then use following sections to break each defensive play or move into its segments and state the intent and the success (or not) of allowing of each segment.

PQ50

With practice, the actualization process of:

Intend It.....

Think It.....

Feel It.....

Know It.....

and Allow It

will become automatic

and successful

(for every play, move, or race)
on the field of competition
and in the arena of daily life.

Appendix C:

Home Actualization Play Sheet (Segment Intending)

Each segment of a day is an opportunity to practice success by intending and allowing events from a goodfeeling place of being. Identify nine segments throughout each day and intend and allow their goodfeeling outcome.

PQ51

The greatness of the human life experience emerges from the flames of individual desire arising out of hell's fiery conflicts on earth. Intention is forged in these fires.

Emotion aligns our journey with these new intentions.

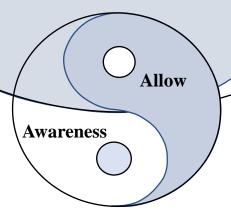

Each succeeding generation will have its own mountains to climb and waters to cross with their own stars to navigate towards. Intent is that guiding star and our emotions perceive its light. The more joyous the feeling, the more harmonious and powerful the wonders revealed through life's journey.

Qigong: The Cultivation of Energy

"It" is all about energy. It is about feeling the energy. "It" is about the good feeling emotions from the flow of energy. "It" is about feeling "IT". Whether the athlete is a chess player or an offensive lineman on a football team; or a ballet dancer or basketball player making a free-throw, jump shot, or three-pointer; or a musician or a forward on a soccer team making a pass or a penalty kick or the goalie blocking that kick; or a wrestler or an alpine skier racing through the gates; or a marathon runner or cross-country bicyclist; no matter what an athlete's sport, "It" is about feeling, maintaining, and then allowing "IT"... through cognitive-emotional re-processing strength and conditioning.

DEFENSE
